

CV-SALTS Executive Committee Meeting
Thursday, March 11, 2021 – 9:00 AM – 10:30 AM

Teleconference Only

<https://global.gotomeeting.com/join/558523453>

You can also dial in using your phone.

United States: [+1 \(571\) 317-3112](tel:+15713173112)

Access Code: 558-523-453

Posted 03-02-2021 – Revised 03-10-2021

- 1) Welcome and Introductions – Chair – (10 mins)**
 - a) Committee Roll Call and [Membership Roster](#)
 - b) Review and Approve [February 11, 2021 Meeting Notes](#)

- 2) Basin Plan Amendments – Implementation Update – Patrick Pulupa, Anne Walters (15 mins)**
 - Program Implementation
 - Management Zone progress and deadlines
 - P&O Study Workplan Status
 - Update on 12-month BPA : [Notice of Opportunity to Comment](#)

- 3) Management Zones – Status Update – Daniel Cozad, and MZ Support Committee members (20 mins)**
 - Implementation Updates from MZs
 - Preliminary Management Zone Proposal Drafts
 - Changes and issues - all

- 4) Prioritization & Optimization Study – (30 mins) – Bobbi Larson, Daniel Cozad**
 - Summary of Review/Discussion of Regulations and Policies Affecting Salinity Management and Next Steps – Bobbi
 - [2/11 Q&A Notes on Salinity Management Regulatory and Policy Challenges](#)
 - P&O Study Participation since January 5, 2021 - Daniel

- 5) PEOC Status Update – Nicole Bell (10 mins)**
 - **LINK** to Outreach Matrix - [Outreach Tracking](#)
 - Outreach Plan and P&O study

- 6) Review Meeting Schedule/Location – (5 mins.)**
 - MZ Support Meeting: **April 6, 2021 2:00 PM or TBD**
 - PEOC Meeting: **April 6, 2021, 3:00-4:00 PM – Conference Call**
 - Policy Meeting: **April 8, 2021, Tentatively 9:00 – 3:00 (Final times TBD) – GoToMeeting**

CV-SALTS meetings are held in compliance with the Bagley-Keene Open Meeting Act set forth in Government Code sections 11120-11132 (§ 11121(d)). The public is entitled to have access to the records of the body which are posted at <http://www.cvsalinity.org>. On March 4, 2020, Governor Newsom declared a State of Emergency resulting from the threat of COVID-19. Governor Newsom issued Executive Order N-25-20 (3-12-20) and Executive Order N-29-20 (3-17-20) which temporarily suspends portions of the Brown and Bagley Keen Acts relative to conducting public meetings. Subsequent thereto, Governor Newsom issued Executive Order N-33-20 (3-19-20) ordering all individuals to stay at home or at their place of residence. Accordingly, it has been determined that all CV-SALTS meetings will be held pursuant to the Brown Act and will be conducted via teleconference. There will be no public access to an on-site meeting venue.

One or more Central Valley Regional Water Quality Control Board members may attend.

CV-SALTS Executive Committee Meeting - Summary Action Notes

For February 11, 2021 – 9:00 AM to 11:00 AM

Attendees are listed on the Membership Roster

DISCUSSION ITEMS

1) Welcome and Introductions

- a) Executive Committee Co-Chair, Debbie Webster, brought the meeting to order, and roll call was completed.
- b) David Cory moved, and Stephanie Hiestand seconded, and by general acclamation the January 14, 2021 Meeting Action Notes were approved.

2) Basin Plan Amendments – Implementation Update

- Patrick Pulupa and Anne Walters provided an update on implementation.
 - The package for the proposed revision to the Basin Plan Amendments is being finalized and is just about ready to move forward to the State Water Board.
 - There are two new Regional Board members. Committee members wishing to schedule a meeting with them should contact Mindy.Maxwell@waterboards.ca.gov
 - Regional Board staff has been focusing on responding to inquiries on the Salt Control Program. The P&O Study Work Plan was submitted to the Regional Board in January. Board staff will be reviewing the work plan over the next few weeks and hold follow-up discussions as needed once the review process is complete.

3) Management Zones – Status Update

- Daniel Cozad provided updates on progress in Kings Water Alliance, Valley Water Collaborative, Chowchilla, Kaweah, and Tule. A copy of the [Status of Preliminary Management Zone Proposal \(PMZP\) and Early Action Plan \(EAP\)](#) for the zones was included in the agenda package.

4) Prioritization and Optimization Study

- Bobbi Larson asked the committee to consider and discuss the following questions:
 1. What do you believe are the biggest obstacles/challenges to achieving salt balance/management in the Central Valley?
 2. What are the existing and future conflicts between different requirements affecting salinity management? Do they exist on the face of the rules/policies or in their interpretation and implementation?
 3. What are the overlapping or conflicting agency responsibilities for regulating and managing water and salinity?
 4. Are there any existing regulatory tools or options that can assist in salt management that are currently under-utilized?
 5. Are there future regulatory changes/reforms that would help to resolve conflicts and facilitate long term salt management solutions?
- Some of the feedback and recommendations from the committee on the questions:
 - A lot of salinity issues are related to water availability. The program needs to stress the water quality ramifications of broader water policy decisions and the potential long-term consequences associated with them.
 - Water quality permitting alone will not resolve the salinity problem.

- The arbitrary application of the Sources of Drinking Water Policy results in a conflict between managing salts in a certain area and the application of the policy. The requirement to go through a dedesignation to manage salts is a conflict.
 - State Water Board’s requirement for statewide uniformity, and reluctance to approve a water quality objective that applies in just one region, results in underutilization of existing tools and creates an obstacle in the management of salts.
 - Consider the use of Existing, Potential and Intermittent classifications as used in other Regions.
 - Tools like variances/offsets (and basin planning in general) are difficult and expensive to use.
 - Two of the biggest obstacles to salt management: Money, and other environmental regulations.
 - It is critical that salinity is perceived as a STATEWIDE issue.
- Daniel Cozad provided an overview of the P&O payment portal. Daniel will follow-up on two issues: correct the information displayed for small wineries, expand the drop down for the number of ponds for Oil & Gas.

5) PEOC Status Update

- Nicole provided an update on PEOC activities.
- The February 10th Salt Webinar was well-received overall and had over 600 participants. The webinar recording, presentation and finalized Q & A will be posted to the website. Follow-up suggestions from the committee:
 - Clarify in the Q & A eligibility for the Conservative Pathway vs. being “exempt” from the P&O Study.
 - Consider a future webinar that targets the water districts and water suppliers.
 - The 2021 Communications Plan, Budget and Timeline were presented.

6) Review Meeting Schedule/2021 Calendar

- Mgmt Zone Support Mtg: **Tuesday, March 9, 2021 2:00 PM or TBD**
- PEOC Meeting: **Tuesday, March 9, 2021, 3:00 - 4:00 PM – Conference Call**
- Policy Meeting: **Thursday, March 11, 9:00 – 3:00 (final times TBD) @ GoToMeeting**

State Water Resources Control Board

NOTICE OF OPPORTUNITY TO COMMENT

PROPOSED APPROVAL OF REVISIONS TO THE SALT AND NITRATE CONTROL PROGRAM BASIN PLAN AMENDMENTS FOR THE WATER QUALITY CONTROL PLANS FOR THE SACRAMENTO RIVER AND SAN JOAQUIN RIVER BASINS AND THE TULARE LAKE BASIN

NOTICE IS HEREBY GIVEN THAT the State Water Resources Control Board (State Water Board) will accept comments on the proposed approval of the Central Valley Regional Water Quality Control Board's (Central Valley Water Board) revisions to the Salt and Nitrate Control Program Basin Plan Amendments for the Water Quality Control Plans for the Sacramento River and San Joaquin River Basins and the Tulare Lake Basin. The Basin Plan amendments were adopted by the Central Valley Water Board on 10 December 2020 (Resolution No. R5-2020-0057), and are available for review at: https://www.waterboards.ca.gov/centralvalley/board_decisions/adopted_orders/resolutions/r5-2020-0057_res.pdf

A copy of the Basin Plan amendments can also be received by mail by contacting Central Valley Water Board staff member Jennifer Fuller at (916) 464-4646 or jennifer.fuller@waterboards.ca.gov.

REQUEST NOTICE OF STATE WATER BOARD MEETINGS. The State Water Board will separately publish an agenda for the meeting at which it will consider adopting a resolution approving the Basin Plan amendments. Oral comments at the State Water Board meeting generally will be limited to a summary of the written comments submitted during the written comment period. Persons interested in receiving notice of the meeting at which the State Water Board will consider approving these Basin Plan amendments **must subscribe** to the State Water Board's [email subscription service](#) located at:

http://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.shtml.

On this webpage under the "General Interests" category check the box for the "Board Meetings", provide your email address and name, then click on the "subscribe" button. The State Water Board encourages use of its electronic mailing list. Persons who require notice by postal mail must submit such request to Central Valley Water Board staff member Jennifer Fuller at (916) 464-4646 or jennifer.fuller@waterboards.ca.gov.

SUBMISSION OF WRITTEN COMMENTS. Persons interested in these Basin Plan amendments are encouraged to submit comments electronically. Comment letters **must be received by 12:00 noon on April 5, 2021**. Comment letters received after that deadline will not be accepted unless the State Water Board determines otherwise. Send comments to Jeanine Townsend, Clerk to the State Water Board, by email to commentletters@waterboards.ca.gov (must be no more than 15 megabytes); fax at (916) 341-5620; or postal mail or hand delivery to:

Jeanine Townsend, Clerk to the Board
State Water Resources Control Board
P.O. Box 100, Sacramento, CA 95812-2000 (mail)
1001 I Street, 24th Floor, Sacramento, CA 95814 (hand delivery)

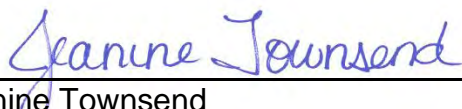

Please also indicate in the subject line, **“Comment Letter—Revisions to the Salt and Nitrate Control Program Basin Plan Amendments”**

REQUIREMENTS FOR SUBMITTING COMMENTS. Pursuant to 23 Cal. Code Regs., § 3779, subd. (f), comments submitted to the State Water Board must satisfy all of the following requirements:

1. Comments must specifically address the final version of the Basin Plan amendments adopted by the Central Valley Water Board.
2. If the Central Valley Water Board previously responded to a similar or identical comment, the commenter must explain why and in what manner the commenter believes each of the responses provided by the Central Valley Water Board to each comment was inadequate or incorrect.
3. The commenter also must include either a statement that each of the comments was timely raised before the Central Valley Water Board, or an explanation of why the commenter was unable to raise the specific comment before the Central Valley Water Board.

Please direct any questions about this notice to Central Valley Water Board staff member Jennifer Fuller at (916) 464-4646 or jennifer.fuller@waterboards.ca.gov. The attorney assigned to this matter is Jessica Jahr, who may be reached at (916) 341-5168 or jessica.jahr@waterboards.ca.gov.

Date March 5, 2021

Jeanine Townsend
Clerk to the Board

Questions and Answers re
Salinity Management Regulatory and Policy Challenges
CVSALTS Executive Committee Meeting
February 11, 2021
(Revised March 8, 2021)

Question 1

What do you believe are the biggest obstacles/challenges to achieving salt balance/management in the Central Valley?

- Water movement and water availability are critical elements of salinity management.
 - Authority over water movement, in stream flow requirements, environmental requirements, water transfers etc. resides outside the Regional Board's jurisdiction and the major water players are not at the table for Phase 1 of the P & O Study.
 - Water exports and water movements in and outside the Central Valley
 - Large water projects contribute to saltier water within the Valley.
 - Although assimilative capacity is removed and has salt impacts, exportation is not considered a discharge.
- The permit-by-permit scheme for regulating water quality does not lend itself to the regional or sub-regional approaches needed.
- The sheer size, scope and geographic diversity within the valley is a challenge.
- The Salinity Control Program must be seen as a California/national issue in order to succeed. Political will, major funding and commitment are key to a long term solution.

Question 2:

What are the existing and future conflicts between different requirements affecting salinity management? Do they exist on the face of the rules/policies or in their interpretation and implementation?

- Water efficiency & conservation—potential to increase salinity in GW
 - Reduced use of water for its purpose usually leads to higher concentrations of salts. During drought, some mandatory conservation leads to permanent reductions which impact salts (low flow fixtures, removal of irrigated landscapes, etc.) This results in higher concentration effluents without necessarily changing the load.
 - What are the impacts on leaching of moving to drip irrigation?
- Instream flow requirements
 - Potential to increase salinity in GW
 - Instream flows may reduce the ability to recycle or to recharge, may increase reliance on groundwater which could lead to a saltier discharge since groundwater typically has a higher starting EC than

surface water. Even where not mandated, instream flows may not allow water recycling because habitat was created by the historic discharge of effluent.

- Water allocation and use (outside valley) versus WQ impacts (in valley)
- Expanded use of recycled water— may be restricted by antidegradation or other water quality provisions pertaining directly to salinity and may be restricted by groundwater recharge regs and concern re CECs
- Brine disposal – may be in conflict with discharge limits in either SF Bay Basin Plan or Ocean Plan for non-salinity related parameters
- Sources of Drinking Water Policy—has been applied broadly and arbitrarily making it very difficult to protect the MUN use appropriately, where it actually exists.
- State Water Board desire for unanimity among regions may limit CV Regional Board’s use of strategies/tools (e.g. proposed limited MUN designation)

Question 3:

What are the overlapping or conflicting agency responsibilities for regulating and managing water and salinity?

- SWRCB regulates water rights, Regional Board regulates water quality
- Department of Conservation, CDFA have roles in addressing salinity
- USEPA role/ability to override on surface water requirements (objectives, uses)
- Planning Disconnects
 - Example Master Plans developed with little input from various city departments
 - Development approvals consider the physical number of wells or total supply, but if several wells are down due to WQ concerns, power, etc., it impacts the amount of water actually available.

Question 4

Are there any existing regulatory tools or options that can assist in salt management that are currently under-utilized?

- Use designations—de-designation, tiered uses, seasonal uses. (Note--current process is difficult, expensive and lengthy. See also note re State Board desire for uniformity in response to Question 2 above.)
 - Differentiation within beneficial uses depending on salinity
 - Characterize uses as existing/potential/intermittent
- Groundwater recharge using seasonal peak flows – may be a tool to improve groundwater quality in some basins—but, conflict with water rights rules that don’t consider recharge a beneficial use; conflict with downstream water rights holders; possible conflict with new stream flow standards established by SWRCB

Question 5

Are there future regulatory changes/reforms that would help to resolve conflicts and facilitate long term salt management solutions?

- Reforms/simplification of the 303(d) listing process
- Simplify the de-designation process for groundwater basins to establish salt management areas (the Tulare Lakebed de-designation of MUN and AGR can provide lessons learned for exploring streamlined approaches.
- Providing a true water rights/water quality nexus and using tools
